To the People of Vermont:

With the successful completion of the Victory Loan Campaign Vermont and the nation has concluded the last of the great war financing jobs. These campaigns in Vermont have been successful because a fine campaign organization has been able to reach a generous and responsive public anxious to do everything in its power to aid our Government in its war effort.

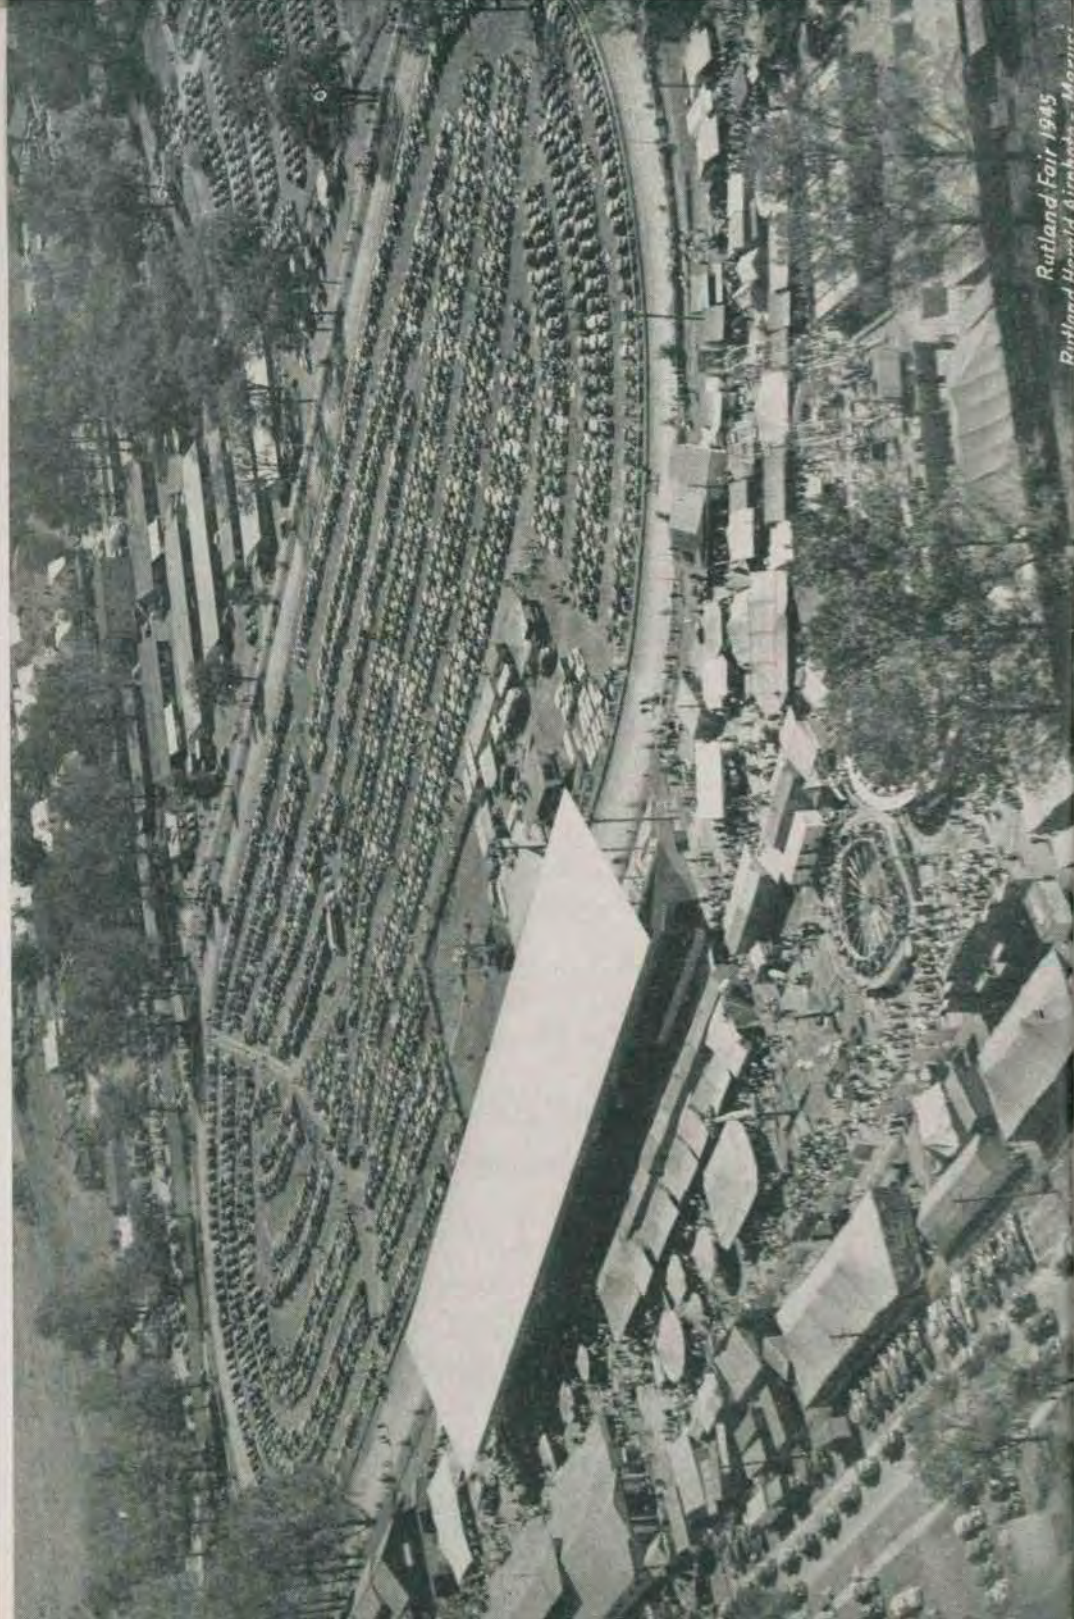

During the eight campaigns Vermonters have subscribed a little more than three hundred million dollars in War Savings Bonds, and with the thriftiness common to Vermonters, a great part of the Bonds are still in the hands of the purchasers. As a matter of fact, the redemption rate for Bonds in Vermont is among the lowest in the entire nation. This is as it should be. Vermont has a reputation to maintain.

This method of saving through the purchase of Savings Bonds has proved so popular that the Treasury Department will continue the sale of Series E, F and G Bonds through banks and post offices, through the Payroll Savings Plan and through a School Savings Plan.

As we assure you of our gratitude for your response in past campaigns, we also ask that you continue to buy and hold United States Savings Bonds through our peace-time program.

MAYOR'S MESSAGE

To the Citizens of Rutland:

It is with pleasure that I submit this report covering the activities for the various departments of the City of Rutland for the fiscal year ending December 31, 1945.

This is the fifty-third annual report of our City. The reports of the various departments are detailed and show where and how the money of the city has been received and expended.

I am happy to say that our financial standing at the close of 1945 is very favorable. As of December 31, 1945, we had a surplus of \$33,631.68 in general funds, and a balance of \$26,309.69 in the school account, total \$59,940.37. The tax rate in 1945 was \$4.30 as against \$4.35 in the previous year. We reduced our bonded debt by \$94,000.00 which leaves the net bonded debt as of December 31, 1945, \$443,478.65. The net bonded debt as of December 31, 1935, was \$965,751.16, indicating a reduction in ten years of \$522,272.51. I continue to favor the City Council levying a sufficient tax each year to take care of the outstanding bonds as they come due, and the continuance of the pay-as-you-go plan instead of incurring a deficit each year.

In an effort to provide better protection of the lives and property of our citizens we have authorized the addition of three extra regular men in our Police and Fire Departments. A two-way radio has been installed for the use of our Police Department and a new fire truck has been ordered for Fire Station No. 2.

Work on the hangar at our Rutland Airport is progressing and we have practically been assured Airline service to New York as already recommended by the Civil Aeronautics Board examiners.

A new chlorinating machine has been purchased and installed in a new chlorinating house at the reservoir, with a view of improving our water supply.

During the year the city sponsored increased playground activities including the operation of skating rinks.

Parking and traffic conditions are matters that require serious study. The installation of parking meters will to some extent relieve the congested conditions now existing. This matter is now being studied by a committee of the Board of Aldermen. Regulations making one-way traffic on certain streets will also help. With the manufacture of new cars and the elimination of gas rations, we will be faced with a large increase in local, as well as through traffic. Something must be done to provide

MAYOR'S MESSAGE

11

parking spaces for those who desire to trade in our stores, etc. New ordinances will be necessary in order that all will be treated alike

The housing situation is also a matter that deserves a great amount of consideration. At this writing the Congress is proposing a bill to expedite construction of homes, giving preference to ex-servicemen. There doesn't seem to me to be much of anything that the City can do to relieve the shortage at present.

The establishment of a Veterans' Center by the City has been under consideration for some time. By law each veteran must have his discharge papers recorded at the office of the City Clerk, and all copies required by veterans must be certified at that office, so additional funds have been appropriated to assist in this work. As the government has opened a Veterans' Administration Office on Cottage Street, and the American Red Cross at 37½ Merchants Row provides a complete veterans' advisory service, it seems to me that the above agencies at least for the present are adequately handling Veterans' affairs. If in the future it develops that anything more can be done, I am sure the City administration will give the matter serious consideration.

The Assessors started their quadrennial appraisal work earlier this year than usual as they are desirous of giving serious consideration to present property values. We all know that property values have increased both from a rental and replacement figure. I feel confident that any changes in real estate appraisals made by the Assessors will be made only after careful study of local conditions.

I want to again congratulate you citizens of Rutland who have made it possible to meet War Bond and Community Chest quotas.

In closing I want to express my appreciation and thanks to members of the Board of Aldermen and all officials and employees for the loyal and efficient service rendered during the past year.

I also want all who in any way assisted or remembered me during my illness to know that their deeds were gratefully appreciated.

Respectfully submitted,

Wayne H. Temple

Mayor.

The children at Lincoln School are learning by seeing

Dinner is ready at Watkins Avenue School

Report of the BOARD OF SCHOOL COMMISSIONERS

To the Mayor and Citizens of the City of Rutland:

This, the 53rd annual report for the fiscal year ending December 31, 1945 of the Commissioners of Education, is presented to you for your interest and approval. As your representatives we have endeavored to spend your money wisely and efficiently and to keep our educational system on a high level. This would have been an arduous task had it not been for the expert guidance and advice of Superintendent Fairchild.

The Board would like to take this opportunity to express their sincere appreciation of all that Superintendent Fairchild has done to keep the school system functioning smoothly and efficiently. He is terminating twenty-five years of loyal, unselfish work in our community and it is with regret that we see him retire.

The year 1945 was a progressive and busy one during which much time and money was spent in repairing and replacing of old and worn out equipment. In addition to this we thought it advisable and the City purchased at a cost of \$1,500. the old barn standing on the north-west corner of the high school lot. This property, when completed, will serve as a field house with showers, toilets, locker rooms, and team rooms for visiting as well as our high school teams. There is also available space for storage of paint, items for repair work and the truck. Heretofore the paint and materials were stored in the basement of the Longfellow School. This constituted a fire hazard and it was recommended by the Fire Chief that we take steps to store it in a safer location. This space has been in use for several months.

Repairs to the field house portion had to be discontinued early last fall because of urgent need of the men in other duties. To date the expense totals \$2,687.94 which includes heating plant and hot water heater, showers and other plumbing articles. Still to be purchased is a suitable flooring material estimated at \$450. We expect the plant to be in operation by the fall of 1946.

It was necessary to install a new heating plant in Lincoln School at a cost of \$3,791.65. This unit replaces three units, one of which had been in use over fifty years. Even with the new plant it was difficult to heat one room. This, we believe,

has been rectified by the use of new type air valves. For some time the roof on this building has given trouble and in order to have adequate protection a new roof with deep copper flashing was built. The cost of this item was \$2,200.

The heating plant removed from Lincoln plus new sections, radiation and stoker at a cost of \$3,133. is to be placed in Kingsley School where it is badly needed. This work will be done early this summer.

Another expense item includes the replacement of obsolete plumbing. These articles, boys' and girls' toilets for Dana, Park, Watkins and Longfellow, have been purchased but only a few have been installed due to lack of help and urgency in other vital repairs. This work can be done during vacation periods and summer months.

With regard to summer months and recreation plans are being studied for improvements in facilities at Dana, Longfellow, Lincoln and Watkins. These we hope to make public in the near future.

Due to the increase in costs of labor and materials, etc., the sound value of our schools has necessarily increased. Therefore, the Board deemed it advisable, because of an agreement with the insurers, to increase our insurance; that is, to bring it up to eighty per cent of actual value. The cost formerly was \$2,108.59, with the addition it is \$2,962.44. The increase was from \$686,000 to \$798,500.

The Board feels that the full-time employment of three repair service men is a great asset especially during these years of labor shortage and chiefly skilled labor. It has resulted in better care of buildings and at a lower cost. Under the old contract system the cost for painting the school buildings on the outside and redecorating them on the inside once every six years was about \$5,000. Under the present plan the cost for the same service is not more than \$2,300. The painter does other types of work two or three months each year making another substantial saving. The list of electrical equipment in use in the schools of Rutland certainly indicates that a man ought to be employed to keep it running:

| | |
|--------------------------------------|--|
| 1,545 light bulbs | 9 limit control switches |
| 100 starters in fluorescent fixtures | 7-2 speed hand control switches on heating units |
| 604 light switches | |
| 259 plug-in receptacles | 2 electric ranges |

| | |
|---|---|
| 34 light panels, total 172 fused circuits | 2 rectifiers for operating clocks and bell systems |
| 66 entrance and safety switches, fused | 53 clocks |
| 71 motors | 76 program and fire alarm bells and buzzers |
| 2 generators | 8 thermostats |
| 71 starting switches on motors | 13 electric clocks and small bell systems in elementary schools |
| 11 magnetic switches | |
| 1 battery charger | |

We believe, while we have not definite figures to prove it, that it is much cheaper to hire a man who is available all the time to keep our electrical equipment in working order. The electrician, like other repair service men, does other work two or three months each year which would cost good money if he were not available to do it. Over a period of years the cost of repairing and replacing heating and plumbing equipment by employing commercial firms to do the work was over \$2,000 a year. By employing a plumber on a yearly basis this has been reduced to \$1,900 a year. The plumber spends at least three months a year doing other types of work which would cost five or six hundred dollars.

During the past the Board has experienced some difficulties with parents wishing to have their children attend schools other than the one designated. We think the city should be divided into suitable districts or zones for each school and the children residing in such areas be required to attend the zone school. Such plans are being drafted and we hope to have them in effect for the next school year.

The per pupil cost in the Rutland system is a matter of some importance and has been discussed by many. Below is an account of per pupil cost and also total cost for years 1942 to 1945, inclusive:

Cost Per Pupil In Average Daily Attendance

| | Average Daily Attendance | With Bonus | Without Bonus |
|------|--------------------------|------------|---------------|
| 1942 | 1,796 | \$104.09 | \$104.09 |
| 1943 | 1,649 | 116.84 | 114.51 |
| 1944 | 1,559 | 128.95 | 122.45 |
| 1945 | 1,573 | 132.56 | 124.30 |

If Average Daily Attendance Remained at the 1942 Level:

| | Per Pupil Cost |
|------|----------------|
| 1942 | \$104.09 |
| 1943 | 104.98 |
| 1944 | 106.29 |
| 1945 | 108.86 |

From the above it can be deducted that the average per pupil cost during the past four years has remained largely the same but for the unpredictable items of increased cost of living and variable student attendance.

The total cost of operating the schools during these four years was:

| | |
|------|--------------|
| 1942 | \$192,413.90 |
| 1943 | 204,696.46 |
| 1944 | 207,111.79 |
| 1945 | 220,289.43 |

On account of the increased cost of living the tax payers voted a cost of living bonus for all school employees which began in 1943 with a 12 cent tax and increased to 18 cents in 1945.

Without the bonus the total costs have been fairly constant and would have been as follows:

| | |
|-----------------|--------------|
| 1942 (no bonus) | \$192,413.90 |
| 1943 (12c tax) | 188,500.54 |
| 1944 (12c tax) | 190,896.91 |
| 1945 (18c tax) | 195,520.96 |

In the financial statement presented for the year ending December 31, 1945 the item "Balance" \$26,309.67 includes an unexpected \$9,186.30. This money represents an increase in State Aid heretofore not allowed to the Rutland system.

Items and costs listed below actually should be deducted from the balance because they all have been voted by the Board and in most cases ordered or contracted for with the exception of tennis court repair. This was voted over a year ago but due to labor and material shortage, a delay resulted.

| | |
|--|----------|
| 1. 10 Four-drawer files | \$330.00 |
| 2. Fence at \$1.25 per foot—Lincoln 270', Watkins 134'; \$505 for fence; \$150 for labor | 655.00 |

| | |
|--|-------------|
| 3. Counter for Superintendent's office | 860.00 |
| 4. Vault for school records | 1,200.00 |
| 5. Heating plant at Kingsley | 400.00 |
| 6. Tennis courts | 2,000.00 |
| 7. Back stop for courts | 300.00 |
| 8. New window draperies and repair and replacement of stage equipment at Rutland High School | 1,500.00 |
| 9. 400 new chairs—Dana 75, Kingsley 25, Lincoln 75, Longfellow 50, Meldon 125, Park 25, Watkins 25 | 1,800.00 |
| 10. Replacement of 100 old and antiquated pupils' desks | 1,375.00 |
| 11. Grading and improving playgrounds—Dana \$500, Kingsley \$150, Longfellow \$300, Watkins \$1,000 | 1,950.00 |
| 12. Low fence 2½" pipe along the west drive at High School and to protect lawns at Dana and Lincoln; material \$580, labor \$200 | 780.00 |
| 13. Electric portable record player, English Department, Rutland High School | 58.00 |
| 14. Repairs to heating system at Rutland High School | 12,000.00 |
| Total | \$25,208.00 |

We will continue to exercise the best judgment we possess in spending the taxpayers' money with due regard for the welfare of the children of the City. We ask your understanding and cooperation in meeting the problems of 1946.

Respectfully submitted,

WESTON C. HAMMOND,

President

For the Board of School Commissioners.

Report of the SUPERINTENDENT OF SCHOOLS

To the Board of School Commissioners, the Mayor, the Board of Aldermen, and the Citizens of the City of Rutland:

This annual report will not show any great change in school procedure but it will show steady growth in the development of plans to meet the needs of children.

There is bound to be a lag between industrial progress and what the schools can do to meet new needs because the schools are tax supported institutions and it takes time for the majority to reach the conclusion that the schools should be modernized.

Nearly all the school buildings of Rutland were built fifty or more years ago when ideas about education were different than they are today but the buildings remain about the same with few facilities for a modern program of education. The buildings have been kept in good repair and a few modern conveniences added but basically they limit the type of education to that approved by the grandparents of the children in school today. When the people of Rutland become aware of the limits

placed on education because buildings have not been modernized they will demand improvement even though the cost is considerable. Each elementary school building should have an addition of sufficient size to provide space for a kindergarten class, for a school library, for school lunches, for a combination auditorium and play room, and for adult education.

We feel proud of the fact that, in spite of inadequate room, libraries have been set up in six of our eight schools. The two schools not equipped with a library are considering every means to find room for one. Since the habit of reading is one of the best results of education it would seem that these school libraries make a most important contribution to an educated citizenry. It should be kept in mind of course that the space available for these libraries is so limited that the service is handicapped. Only two elementary schools have suitable space for a library.

While we have no adequate facilities for serving a hot lunch at the various schools of the city, seven schools have established a lunch program for feeding six or seven hundred pupils each day. Many parents have discovered that their children can be well fed at the school and for less than the cost at home. A hot lunch served at the school seems to be an essential requirement in a modern society so it would seem wise for the city to set about providing better facilities for the project.

From July, 1941 to June, 1945 we carried on a defense program in the schools which contributed to the war effort and trained men and women for various war activities. The success of this enterprise was due in no small degree to the devoted and persistent effort of Mr. Henry Doll who supervised the project for the whole period. I have asked Mr. Doll to give a brief summary of the program:

"The War Production Training Program started at the Dana School in July, 1941. In October of the same year it was moved to the Rutland High School annex where it continued in operation until June 1, 1945. For the first year and a half, the Rutland Defense School ran twenty-three out of twenty-four hours a day. Later it was reduced to sixteen hours a day and then at its closing ran twelve hours per day.

"The training at first consisted of courses in Machine Shop and Mechanical Drawing and Blueprint reading. Later, courses in Auto Mechanics, Power machine sewing and Welding were added to the program. Also, during this time training was given 'key' men in the local industries in Job training in order to assist them in their work.

"During the four years of operation, the following number of persons received training at the Rutland Defense School:

| | |
|---|-------|
| Pre-employment Machine Shop | 467 |
| Advanced Machine Shop | 243 |
| Auto Mechanics | 145 |
| Welding | 97 |
| Power Sewing | 151 |
| Mechanical Drawing and Blueprint reading | 212 |
| Total | 1,315 |

"In addition, the Training-Within Industry program gave instruction to 195 persons in 'Job Training.'

"The trainees at the school came from an area of forty miles. The majority, however, were local.

"In letters received from a number of industries great praise was given to the school for the fine work it had done in assisting them in keeping production rolling during the war years."

Mr. William A. Sargent resigned last July after serving as principal of our junior high school for twenty-three years. No one can measure with any degree of accuracy the influence of a man of such sterling character as Mr. Sargent on the lives of more than four thousand children who passed through his school. Parents, youth and associates are of the opinion that the influence was great and that it always led in the right direction. I think that I am expressing the opinion of most of the people of Rutland when I say that I am sorry that circumstances were such that Mr. Sargent found it necessary to leave the teaching profession.

Most people are quite aware of the values of visual aids in teaching. The Meldon School, under the leadership of Mr. Sargent, did the pioneer work here and carried on a program for nearly twenty years. During more recent years other schools have come into the program until five of our eight schools are doing considerable with visual instruction. At the present time the schools own five machines for showing films, largely 16 millimeter, and six film strip machines. Approximately one thousand periods are devoted to showing about four hundred films through the school year. These showings are nearly all made in the class room and are related to the subject being taught at the time. A number of other films are shown to larger groups for general instruction and for entertainment.

The cost of education like the cost of nearly everything else has advanced during the last twenty-five years. In 1921 it cost just under ninety dollars per year for each pupil in average daily attendance at Rutland High School. In 1945 this cost has advanced to almost \$170. The enrollment now is about twenty per

cent higher than in 1921 but we have increased the number of teachers fifty per cent to provide more and better services for our boys and girls. The total salaries of the eighteen teachers employed in 1921 was \$31,788 while the total salaries of the twenty-seven employed now is \$59,230. Costs other than salaries have increased because the school is housed in a better building which costs much more to operate and numerous opportunities for our youth are provided which were impossible in 1921.

New courses such as those offered in the trade school department and distributive education meet the needs of youth but cost more because the classes must be small and salaries are relatively higher.

The improvement of the health of school children is regarded by all school people as a number one objective. While the home has the primary responsibility for health instruction and the formation of right health habits, other agencies such as the public health department and the schools can do much to develop stronger men and women. Sometimes it seems advisable to give special attention to certain areas of health. Last year in cooperation with other agencies we devoted considerable attention to the matter of checking the hearing of school children. This was done under the supervision of the school nurses, Mrs. Anne H. Wimett and Miss S. Elizabeth Keefe. I ask you to read their report on the following pages.

Few people are aware of the importance of Art in the life of our people. Miss Lucy H. Doane, our competent supervisor of art, discusses this very interesting subject on pages 28 and 29 of this report.

The schools have been operating for four years under war time conditions which have hampered us in numerous ways. Our teachers have carried the additional load imposed by the war without complaint and have redoubled their efforts to lessen the strain of war on the children. A number of our teaching positions have been filled by former teachers who were glad to give up the comforts of home to do their part toward winning the war. The fact that the schools have been able to operate in spite of a great shortage of material and labor is due in no small degree to the efforts of the men of our repair service and to our janitors.

I am happy to say that it has been a pleasure to work with a group of devoted teachers and other competent employees.

Respectfully submitted,
WILLIAM W. FAIRCHILD,
 Superintendent of Schools.

Library Hours

A Test of hearing with an individual audiometer

REPORT OF THE SCHOOL NURSES ON LOCATING AND HELPING THE HARD OF HEARING

The use of an audiometer to test the hearing of Rutland public and parochial school pupils is another indication of the attention being given to the health and physical soundness of today's youngsters. No longer is it solely a case of trying to impart knowledge to youthful minds; it is also a question of seeing that those minds are housed in sound bodies. For there is a direct relation between a child's progress in his studies and his physical condition. Many a youngster who appears to be dull, uninterested and difficult is actually nothing of the sort. He is suffering from some handicap which conceals his ability and shows him to the worst possible advantage.

Science can and does determine what those handicaps are and science is able to correct many of them. The important thing is to detect them at an early age so that they can be corrected.

In January and February, the Rutland school nurses used one of the group audiometers owned by the State Department of Education to give a screening examination to approximately three thousand children in the public and parochial schools of Rutland. All school children who showed any irregularity or sub-normality in hearing ability in this annual group test were given an individual test by Mr. Donald M. Eldred, Supervisor of Technical Aids for the State Department's Vocational Rehabilitation Service. The test was performed with a new type of instrument, the individual audiometer which has been in use only recently and testing of the children in local schools has been completed.

After the testing was done, the school nurses urged the parents to take these children to an ear doctor for examination and recommendation as to what should be done for each case. Follow up work was done on each case where treatment or a hearing aid was recommended.

For those who were unable to pay for examination, treatment, or hearing aids, the Vermont Association for the Crippled plans to provide both a physical and an ear examination through local doctors and also to purchase hearing aids where they are needed. This assistance will be made available through Miss Dorothy Smithson, Executive Secretary of the Association, and it is made possible through the money received from the Association's annual distribution of Easter Seals.

Miss Smithson and Dr. George G. Marshall, Vermont Chairman of American Academy of Ophthalmology and Otolaryngology, are coordinating the whole program in hope that later similar projects may be carried on in other parts of the state.

The importance of this testing is evidenced by the case of a twelve year old student who showed an almost total loss of hearing in one ear while the other ear is beginning to be affected. Another serious case is that of a fourteen year old high school student who also showed an almost total loss of hearing in one ear while the other ear is also becoming affected. It is possible that the purchase of a hearing aid in the immediate future may help this child's hearing but this is by no means certain since the bad ear has gone so long that it may be impossible to give hearing in the bad ear with a hearing aid. Time is of the utmost importance. This testing program has been of great value in bringing situations such as these to light so that something may be done without further delay.

As a result of the tests given two groups of children with hearing difficulties were recognized:

1. Definite treatment advised
Fourteen were advised to see a doctor and eight were regarded as borderline cases. Five of the former and three of the latter went to a doctor. Treatment was prescribed for the three in the latter group.
2. Treatment might be desirable
Forty-one were urged to give the matter of consulting a doctor consideration and thirty-five were regarded as borderline cases. Ten of the former and three of the latter group consulted a doctor. Three of the former group were advised to have treatment.

Respectfully submitted,
S. ELIZABETH KEEFE,
ANNE H. WIMETT,
School Nurses.

REPORT OF ART SUPERVISOR

Anyone can draw.

Perhaps you have heard these words and said to yourself, indifferently, "So what?" or thought, "That's a lot of foolishness."

Actually the statement is true, not that anyone can be an artist, but that anyone can draw and will be a better man or woman for being able to—for many reasons. Here are some of the reasons.

Drawing as it is taught these days is divided into various areas of study. These are generally known as REPRESENTATION, DESIGN, COLOR, CRAFTS, and ART APPRECIATION. It will be easier to explain that each area covers separately but you will see as you read along that the areas are independent when taught.

REPRESENTATION covers a large area—all of the child's life itself. In the first grade we find the child, when he comes to school at the beginning of the year, confidently drawing pictures of people, houses, trees, animals, and all sorts of vehicles, pictures which to most adults are unintelligible scrawls, but which to the child are very real. These drawings, from whatever part of the country you may observe them in any first grade, are surprisingly alike. A man, for instance, will be represented as a circle (the head) from the ear area of which two stick-like arms project, while the legs, also two sticks with toes, will hang bodyless. This sort of representation is known as symbol drawing and parallels prehistoric man's earliest art efforts as evidenced on the wall of caves in various parts of the world.

Other objects are equally symbolic. A house resembles a tent, with a tipping chimney. The windows may be floating beside the house. A tree is usually a circle for the foliage and a line or two for the trunk. Cars are recognizable by their wheels. The job of the teacher of art is to lead the child, through observation of himself, his companions, and the world about him, to realize what people, houses, trees, and other things are actually like. To increase the power of observation is one of the main objectives of art education, not only in regard to how people and objects look, but in how they act, are related to each other and to the rest of their environment.

This sort of direction is carried on in various ways through the early grades, with subject matter for the children's drawings adapted to the seasons, to their play activities, and to various studies in each grade—as in the first grade in connection with the study of the family and the farm units; in the second grade with the study of the community, the Indians and the Eskimos; in the third grade with the various countries of the world; in

the fourth grade with Vermont and Colonial Life; in the fifth grade with the sections of the United States; and in the sixth grade with Canada and the Latin Americas.

In the seventh and eighth grades more stress is laid in the area of REPRESENTATION on techniques, or ways of doing, such as painting in water colors, poster paints, or working with crayons and chalk in different ways.

In high school where the art work is elective in contrast to the first eight grades where everyone participates, the student has more individual work, according to his particular bent, as well as certain required reviews of the fundamentals of drawing. The individual work may be for the student's own good, or occasionally for the good of the school or community as a whole, by his contribution of posters, scenery painting, sign painting, wall decoration, or even city report illustration.

The second area is that of DESIGN. This overlaps that of REPRESENTATION in that in order to have a good representation you must have a good arrangement, or design, of all the parts of a picture, a poster, a costume, a room, a garden, or a piece of sculpture. This is design applied and is a very important part of every day living.

Here the student learns indirectly how to discriminate in his choice of the beautiful from the ugly in selecting from all that is offered for sale on the radio, in the magazines and newspapers. He is taught that design stems directly from Nature—and learns Nature's laws of design.

These are REPETITION, ALTERNATION, and PROGRESSION, terms that mean nothing to the first grader, but he does learn how to make a border design of one subject, which he draws again and again—REPETITION; and he is able to draw another border of first one thing, then something different—such as a square, a circle, a square, a circle to make a design in ALTERNATION; or another decorative bit which grows progressively larger or smaller like the Three Bears, the small, the middle-sized, the large—to become a design in PROGRESSION.

Types of balance in design are taught such as CENTRAL BALANCE, perfectly illustrated in Nature by the daisy, the wild rose with their petals radiating from the center; and AXIAL BALANCE which is evident in MAN himself, equally balanced, arm for arm, ear for ear, foot for foot.

All these types of design are reviewed each year, with recognition of their sources from Nature by knowing and observing REPETITION in leaves along the stem, ALTERNATION of days and nights, PROGRESSION of toes on our feet, feathers on a bird's wing or in the changing sizes of the waxing and waning moon.

In the upper grades these basic elements in design are applied to decoration of notebooks, cards, posters, kerchiefs, and papers, scenery, pictures, and more subtly are used as standards in judging whether objects and arrangements are balanced, in good taste, and suitable to the purpose as well as attractive decoration.

COLOR, as you can see, is greatly related to DESIGN, really an essential part of it. COLOR has a family, rich in quality. There is HUE, which is color itself. There is VALUE, which is one word for the light or dark of a color, and the shades between the lightest and darkest of any one color. There is CHROMA which is another word for the brilliance or dullness of a color.

There are three PRIMARY COLORS which, if combined properly, will make the other colors. The three PRIMARIES are Red, Yellow and Blue. The first grader finds out about these through use, mainly with crayons, occasionally with chalk, and in some cases with paint. Throughout the early grades COLOR is combined with REPRESENTATION and DESIGN, but from the fifth grade on, it is taught as a subject by itself as well as applied to illustration, design, and craft work.

CRAFT work is carried on in a small way, mainly because of the lack of time, equipment, and trained people to carry it out. Good craft work requires care and precision, and when carried on by a great many students, a great deal of supervision.

We compromise by doing work with paper, scissors, and paste where the main objectives are not to make a professionally finished product, but rather to train the pupil in the use of the ruler, the manipulation of the scissors, and the ability to follow directions.

There are, however, in the Rutland system several teachers whose training and interest qualify them to carry on paper construction, basketry, clay modeling, soap carving, wood carving, sand-table construction, and miniature moving pictures, and they are to be commended. It is to be wished that more time were possible for work of this sort.

Last but not least to be mentioned is the area of APPRECIATION. APPRECIATION OF ART means more than the appreciation of painting or drawing. It should mean the appreciation of all that is beautiful in all the arts, and a realization of the kinship among the arts—Sculpture, Painting, Architecture, Literature, Drama, The Dance, and Music. It should mean an appreciation of what we see around us in our own country, our own state, our own city, both the good and the beautiful, God-made and man made.

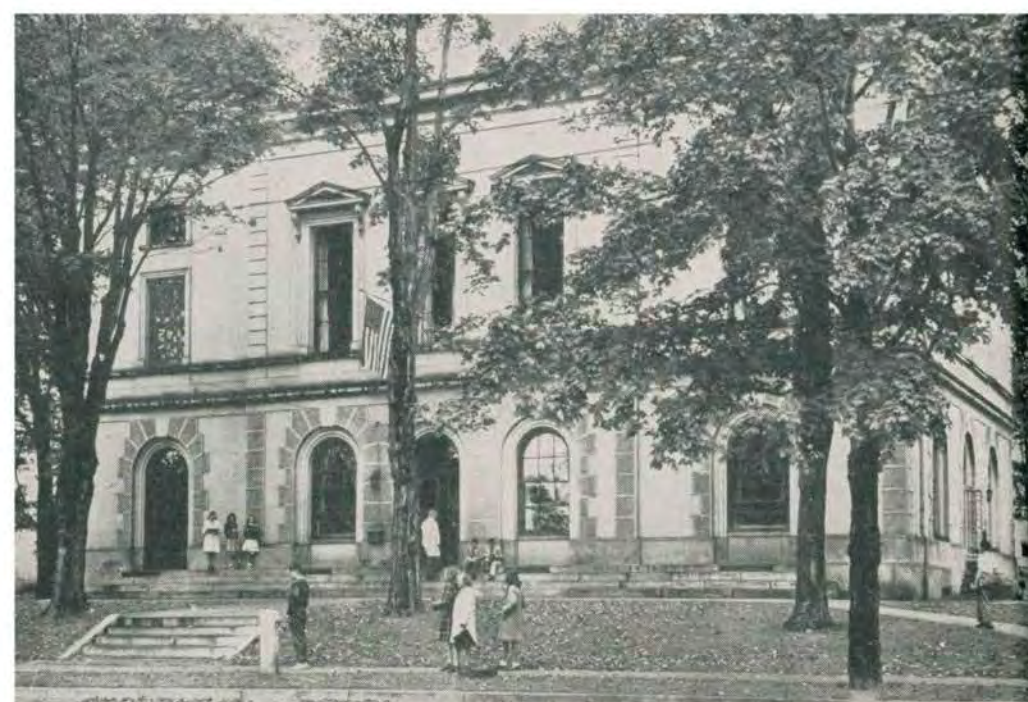

Our mountains, our relative lack of billboards, our churches, inside and out, our books, their covers, their illustrations, all these are worthy of appreciation. Our houses, our cars, our public buildings, all these are worthy of critical consideration.

All these are part of ART APPRECIATION, informally worked into the other areas so that they may mutually enrich each other.

The work in ART is not planned for the future artist alone. The old ideas of teaching Drawing so that a child may become an artist, or that he may have Drawing as a relief from other subjects have passed on.

Instead, we hope that the average boy or girl may, as an individual citizen, be able as a result of his art training to select articles of merchandise which give him lasting satisfaction; be able to arrange his home attractively; be able to use his art resourcefully as a recreational activity in crafts, modeling, or painting; that he may be able to express himself in art creatively and with imagination; and that he may discover whether or not he wishes to follow art through as a life work in one of the many occupations, such as textile designing, pottery, china making, furniture, clothing, jewelry, and the building trades, as well as in the other fine arts of painting, sculpture, and architecture; and finally, what is most important for most people, we hope he will be able to see, hear, know, and enjoy Beauty in his particular environment. These are experiences possible to all.

Respectfully submitted,
LUCY H. DOANE,
Art Supervisor.

RUTLAND FREE LIBRARY

Report of the TRUSTEES AND DIRECTOR

City's appropriation—\$13,760.26

To the Honorable City Council:

Gentlemen:

In submitting to you the sixtieth Annual Report of the Rutland Free Library, prepared by Marion Humble, Director of the Library, and by Prescott H. Wellman, Treasurer of the Board of Trustees of the Rutland Free Library Association, I wish to acknowledge especially the splendid cooperation received during 1945 from the Mayor, the Board of Aldermen, and the Library Committee of the Board of Aldermen.

This city property has been greatly improved during the year by your care of the trees, and by necessary repairs to the

PUBLIC LIBRARY

33

roof. The new light at the Court street entrance is a protection to library users.

The Board of Trustees also appreciate your cooperation in securing revision of the City Charter and increased maintenance funds for the Library.

Very truly yours,
IRENE NOBLE,
*President, Board of Trustees,
Rutland Free Library Association.*

REPORT OF THE LIBRARY DIRECTOR, 1945

(For Statistical Report, see City Finances Section)

To the Honorable City Council:

A detailed report of the activities and services of the Rutland Free Library during 1945, with statistics for the year, is herewith submitted to you. As an introduction to this report I wish to submit the following **recommendations** for your serious consideration, some of them repeated from my report of 1944:

1. The addition of two full-time, professionally trained persons to the staff, to enable the library to render more efficient service to schools and to adult groups and individuals, especially in the vocational problems of veterans; and to facilitate the technical work within the library of reference questions, book ordering, classification and cataloging.
2. The establishment of library stations or branches both at out-lying centers of the city and town, and also in the business district; or the purchase of a Rutland Free Library bookmobile to take regular book service to points in the city and town distant from the Main Library. Such service would naturally require increased funds for maintenance and the larger staff recommended in (1).
3. The making of a survey of present library operations, services, and community needs, for the purpose of greater efficiency and more economical expenditures in expansion of the Rutland Free Library. Mr. Joseph L. Wheeler of Benson, Vermont, formerly librarian of the Enoch Pratt Free Library of Baltimore, and the Youngstown, Ohio Library, has made helpful

surveys of the public libraries in Albany, Buffalo, and other cities, resulting in economies of operation and improved community service.

A year ago I made several recommendations to this Association and to the community, two of which were acted on within a few weeks: **one**, revision of the charter of the City of Rutland was recommended to the State Legislature, with unanimous approval of the Board of Aldermen, permitting the Aldermen to appropriate each year "a sum sufficient for maintenance of the Library," removing the limitation of "five per cent of the grand list," which was authorized in Act No. 331, Acts of 1908; **two**, with your assistance and support, the appropriation for the Library was increased by vote at Town Meeting by the amount of two per cent of the grand list. We believe that the 1946 Town Meeting vote for an additional two per cent increase will give conclusive proof to the Board of Aldermen that Rutland citizens want this Library to continue to expand its usefulness, and that they are willing to finance such expansion. The total amount we request for 1946 is still below the professional standard for minimum library service, which is \$1 per capita per year.

You will be gratified that our 1944 report has been widely quoted in educational journals. We have had many requests from libraries throughout the United States for copies of that report. Our experiment with films in 1944 and early 1945, made possible by the loan of a projector and films from the Harmon Foundation of New York City, was featured in the **Library Journal**, June 1, 1945; Gaylord's **Library Triangle**, October; the **March of Time Film Forum** sales letter, October 27; and the **Postwar Information Bulletin**, December, 1945.

Among our 1945 accomplishments were:

1. **Improvement of our physical plant**, the city property which constitutes the library building and grounds. We put a wagon load of soil into bad spots in the lawn, applied lime, fertilizer and seed to the entire lawn, rolled it in, with the help of boys working part-time, and the lawn roller lent us by Dr. Clarence F. Ball. The City pruned and trimmed the trees so that our new crop of grass came up bravely. Our Outdoor Reading Room was beautified, and the entire park, a conspicuous show place of the city was improved. New chairs and fresh paint improved the summer reading room.

The entire second floor, including the Auditorium, the Vermont room, the Regional Library, and the hallways, were decorated.

New bookcases were added to the Reference and Children's rooms on the main floor, new shelving was added on the main

floor, and on the third floor for magazine storage. Steel stacks have been unavailable and their cost outside our budget; but green paint made the new shelves quite harmonious with the costly steel shelving installed when the Federal building was converted into a Library. Again, this has been accomplished with part-time assistants.

New lights have been placed in the third floor storage rooms.

And in consideration of our physical plant and its needs, I want to underline the most important addition that has been made to this Library in the past two years: **a full-time janitor**, who has been with us since April. Floors, windows, sidewalks, furniture, walls, time and nerves are being conserved because we have a janitor—George Myers—who takes pride in his work!

2. With more funds, we have been able to purchase **more books and magazines**. New reference books and new children's books, especially, were needed; during the year we have added the 16 volumes and Index of the National Encyclopedia of American Biography without which our first 15 volumes were practically useless; we have added The American Encyclopedia, Poetry and Essay Indexes; biographical and governmental year-books. Replacements of torn and worn-out books have been made, though this is an endless process in a library sixty years old.

Our magazine list, one of the best in any small library, has been strengthened, not only by additional subscriptions, but by many gifts. Among our donors are Dr. and Mrs. Clarence F. Ball, Mrs. Henry Clement, Dr. John Thomas, Count Orlovski of Pittsford, the Howe Scale Co., Mr. and Mrs. Batcheller of Wallingford, Miss Erane Welch, Mrs. F. R. Patch, Mrs. E. R. Hopkins, Miss Mary Harwood, Mr. Kenneth Nourse. The **Rutland Herald** has presented us with 121 bound volumes of the **Herald**, and with the Editor and Publisher Yearbook. The organization and labelling of all our unbound magazines have taken a great deal of time, accomplished chiefly with the assistance of part-time workers and vacation assistants.

3. Though we still need professionally trained assistants, **we strengthened our staff during 1945** by the addition in the fall and winter of two stenographer-typists who are a great help in all clerical and record work, and in much of the circulation of books; and during vacation, with Miss Louise Willis, Pittsford teacher, and Miss Dorothy Whitney, working in the Rutland Free Library as part of her field practice work for Antioch College.

Part-time workers have included Mrs. Frank Mann, Miss Elizabeth Thompson, Mrs. Jean Brehmer Falanga, and Mrs. Crawford Taylor. Two boys from Rutland High School, John Previe and Robert Noble, and two boys from Mt. St. Joseph Academy, John Clark and James Ready, are our part-time pages.

4. **Most important among services developed in 1945,** is our **"Careers and Opportunities"** corner, where books, magazines, pamphlets, college and trade school catalogs are consulted daily by veterans and others. With cooperation of the **Rutland Herald**, news stories and editorials have featured this service; the U. S. Employment Service, the Red Cross, the U. S. O. have distributed 600 copies of our Library postcard imprinted with an invitation to use the library, hours of opening, etc. Our three Victrolas and record collections, presented by Mr. and Mrs. Edwin W. Lawrence, Mr. and Mrs. Edward Robinson, and Mr. and Mrs. Walter S. Cramton have been much used, especially by service men in Rutland.

Also announcing our hours and services have been 100 large posters placed in store windows, club rooms, railroad and bus stations, hotels, etc.

During the summer, in cooperation with the Rutland Chamber of Commerce, the local railroad and bus stations, and the Vermont State Publicity Bureau, **we distributed hundreds of circulars and time-tables**, and answered scores of inquiries about trips and hotels and restaurants in the state. We also developed a file of folders and maps from all the states, which is much used in the expansion of travel. Many wives of servicemen have come in for information about Colorado, Florida, Arizona, even steamer passage to Italy, in planning to join their husbands.

We cooperated with Mrs. Elizabeth V. Gilmore of the Vermont State War History Commission during the summer, furnishing her with information, and filing copies of her reports in the Library.

For the War Food Administration we distributed several hundred bookmarks, "Wanted: 250 Million Pounds of Kitchen Fats for War Use"; for the United Nations organization, copies of charts and reports were distributed; for the Veterans' Bureau, scores of pamphlets on information for discharged service men.

Lists of additions to the Library are mimeographed every two months, distributed from the library, and mailed to teachers, ministers, club and organization leaders. We hope some day to

have enough funds for a library news sheet, which will carry news of new books in more attractive and readable form than the present lists.

5. **Continuing activities:**

We carried on our **film showing** from September, 1944 to February, 1945, when the fuel oil shortage made it necessary to close our Auditorium and cut the use of fuel and electricity. The Library Board was so convinced of the success of our use of films in attracting new library users, and connecting visual education with reading, that it authorized purchase of our own sound projector as long ago as last April. Until recently, there have been no projectors available, but we hope to have one soon.

During the past few weeks we have been giving concerts of **recorded books and music** for children on Saturday mornings, but we find that records do not attract the crowds that attend film showings. We have played "Peter and the Wolf," by Prokofieff; Victor Herbert's songs; Stephen Foster's songs; and Kipling's Jungle Book, and Robin Hood records, lent for the occasion by Stephen Elmer, age eight.

The Director broadcast a second series of radio talks last spring; 12 interviews, including one with Miss Mary McKeogh on the reading program of the Catholic Daughters; one with Mrs. Katherine King Johnson, on the work of Mid-Vermont Artists; one with Mrs. Fred Clark, on garden books; one with Mr. Albert Fancher of the **Herald** on vocational books. We hope to resume radio talks again this spring; they were discontinued at the vacation period last June.

Many important meetings of organizations were held in the Library including:

Army and Navy Training Subcommittee, instruction in termination of war contracts, school for employers, August 14;

New England Regional Labor Board, meetings with employers and with employees, July 9 and 10; exhibit of new books and pamphlets on labor relations;

League of Women Voters, talk by Dr. Thorne on mental diseases, February 8; State Convention, with talk by Dr. Wing-tsit Chan, and exhibit of books on China, May 18; regular meetings of League, second Tuesday each month;

Green Mountain Club, June 2, and Executive Committee, October 12;

Mid-Vermont Artists, frequent meetings; one in December with carols sung by Meldon school choir;

Friends in Council, April 7, and October 24, with films, records and book display;
 Federated Garden Clubs, April 20, September 20;
 Rutland town teachers, December 13; plans made for Rutland library stations in town schools;
 Recreational Council, January 16;
 Boy Scout troop No. 5, January;
 Boy Scout Cub Den No. 1, spring meetings, weekly;
 Methodist Society of Young People, films, February 9.

Several teachers have brought classes to the Library: Mrs. Morrill, Rutland High School, April 25, to hear records of Macbeth; Miss Colty, Dana School, February 15; Mrs. Bruce, Dana School, 2nd grade; Kingsley School, 4-5 grades; Miss Haugh, Meldon School, 7 grade, in 4 groups; St. Peter's School, 7-8 grades. At the request of Sister St. Mary Hilary, principal of St. Peter's School, Miss Humble and Mrs. Fuller spent an afternoon advising several of the teachers and students about cataloging the school library books.

Exhibits held in the Library, in addition to those mentioned above:

Koala bear toy, and egg of an emu, lent by Mrs. W. H. Wilford, sent by Lt. Wilford from the South Pacific, January; exhibited with books and maps on Australia;
 Spring flowers and plants, gifts of Mrs. Fred Clark, and Mr. and Mrs. Webster Wagner, of Pittsford, labelled with popular and classical names, exhibited with books and garden catalogs, March, April;
 Books about Italy, Columbus Day;
 New children's books, Children's Book Week, November;
 Books on youth at time of Vermont State Youth Convention, September;
 Books for Lenten reading;
 Permanent display of books donated by Catholic Daughters, Court Gaffney;
 Easter, paintings of flowers; May, Children's Art exhibit, with children actually working on art projects; Summer exhibit; Permanent winter exhibit; Mid-Vermont Artists.

Talks and Book exhibits by staff members, outside Library:

D. A. R. December 12, talk "What books shall I give?" This year, as a new feature, we **sold** books, in cooperation with Hartford's Book-store and the News Shop;

and distributed copies of the Christmas section, co-operation of **Boston Herald**;
 Baptist Fireside Fellowship, February 6; The library, new books;
 Catholic Woman's Club, book reviews, January 20, December;
 Rotary, April 30, "The Business of Running a Library";
 West Rutland Church Club, October 10;
 Cuttingsville Get-Together Club, November 13;
 Zonta, December;
 Woman's Society for Christian Service of the Methodist Church, February;
 PTA Meetings; at Watkins School, Dana School, Center Rutland School, Kingsley School, Meldon School;
 Mrs. Aldo Merusi, of the library staff, is official book reviewer and advisor, AAUW and Community Club.

Innovations:

1. For the first time since 1940, circulation began to increase in May, 1945:

Increases over 1944:

May, 1,600; June, 600; July, 700; August, 800; September, 800; October, 900; November, 2,200; December, 1,200.

The staff has been hard pressed to care for this increase, with the increased time spent in the new type of reference work. (See list of some of questions, below.)

2. We discontinued the Rental Library January 1, 1946, where duplicate copies of new books had been available for 2 cents a day, for the following reasons: This is a **free** library which should not compete with the commercial lending libraries within a few blocks. All new books now go directly into circulation in free collection.

New books and recent magazines are charged out for two weeks with no renewal privilege.

All books 4 months or more in the library and all magazines, 4 months or more old, unless there is some special demand for class work, forum discussion or other current interest, may be taken for 4 weeks, renewable for 4 more weeks. A convenience to borrowers, fewer fines to pay, slow readers need more time for books; a convenience to staff, not so many overdue notices to send; in line with practice in other progressive libraries.

Libraries are attempting to encourage people to read; why spend so much time and energy trying to get books returned unless they are requested by others?

Reserves are taken for all books wanted; if there are not enough copies to fill demands, more are purchased; if books are requested which are not in the Library, they are bought, or borrowed from another library.

AMONG IMPORTANT INQUIRIES HAVE BEEN THESE:

For Vocational Guidance—

How to prepare for jobs in Plastics, Veterinary medicine, Farming, Diesel engineering, Radar, Journalism, Glass manufacturing, F. B. I. and other government work, Television, Pharmacy, Managing tourist camps.

For Personal Problems—

Mental hygiene for the middle-aged; Current value of the **yen**; Identification of antiques, and detection of fake objects; Plans for new homes; Designs for stencils for painting furniture; Re-finishing old furniture; Child psychology and care; Sex instruction for adolescents; Details for a formal wedding; Cultivation of roses, tulips, orchids and irises; Identification of wild flowers; Vocabulary building; Care of a Boxer dog.

For help on the Job—

Aluminum polishing; Accounting for a small business; Enameling on brass; Types of tropical woods; Wood carving as a business; New books on teaching and education; Wood working for instruction; Tables of standards and measurements.

APPRECIATION

The progress that has been made during 1945 would not have been possible without the wise direction of conscientious members of the Library Board and its officers; without the wholehearted support of members of the Library Association and others of the community who supported the Library Board at Town Meeting and throughout the year; without the devotion and loyalty of staff members to their responsibilities as public servants; without the continuous interpretation by the **Rutland Herald**, of our services and our needs. We are deeply appreciative of our friends and their cooperation, and hope that our work together may expand for the benefit of the entire community.

Respectfully submitted,
MARION HUMBLE,
Director, Rutland Free Library.

January 15, 1946

Report of COMMISSIONER OF PUBLIC WORKS

To the Mayor and the Honorable City Council:

Gentlemen:

In compliance with the charter of the City of Rutland, I am herewith submitting the annual report of the Department of Public Works for the year ending December 31, 1945.

The year just passed was eventful in many ways. The conclusion of World War II late in the summer saw the lifting of many construction restrictions imposed by the Federal Government during the war years. Many items of material and equipment which had disappeared from the market during the past four years were again available in limited quantities. The department also was able to employ several war veterans to replace men lost during the war years.

The work of the Department of Public Works was carried out to the best of our ability with the utmost economy prevailing but with the health and security of the people served paramount.

Although gross operating costs increased over the previous year the Department returned a balance of \$14,782.46 in unexpended appropriations to the General city account.

The extreme weather conditions of the previous winter brought the surface treated gravel streets through in a very poor condition creating a problem for the Street Department. The work of retreating these roads was handicapped and delayed by an unusually rainy season. Practically the entire summer season was used in ripping up, regrading, rolling and applying the finish coat of bituminous treatment to the various streets. 32,160 gallons of asphalt and 24,884 gallons of tar were applied and mixed with 1,300 cu. yds. of sand and 85 cu. yds. of pea stone, covering 207,076 square yards to build up a wearing surface.

Following the policy of stockpiling a mixture of tar and sand for cold patching surface breaks, we again mixed 4,300 gallons of tar with 274 cu. yds. of sand for future use, but due to the fact that an unusually large number of breaks appeared in the road surfaces we were forced to use a large amount of our reserve immediately.

Snow removal and plowing was carried on as usual with the men and equipment going out earlier in the morning so that the preliminary work could be completed before the parking of cars could hamper the work. A considerable saving was accomplished during the final months of 1945 due to the fact that only one storm of major proportions occurred.

667 cu. yds. of sand and 46 tons of salt were applied to the streets and sidewalks during the winter months. Seven additional sand boxes were set out this year making a total of 67 now in use.

Two sidewalk sanders, built by Department men at a very small cost from second-hand materials, were put to good use enabling the department to cover many more miles sooner than the old hand method permitted.

A used mowing machine was purchased for use with the small tractor. This was used to cut grass and weeds along the edges of the streets and sidewalks.

One step in the centralization and expansion of the Public Works Department was made when the lot adjoining the present storage yard was purchased. It is hoped by this department that it will be possible to construct a modern garage at this site. The value of this proposal to the taxpayers will be manifold—permitting speedier and more economical operation of all branches of the department, and storing under cover many pieces of equipment that now are exposed to the elements.

The General Department of the Public Works Department carried out the usual work, maintaining the parks, dump and incinerator, bridges, culverts, trees and doing other miscellaneous jobs. The road surface of River Street Bridge was given a coat of asphalt and pea stone and the curbs and railings were repaired. Crescent Street bridge floor was entirely replanked with hemlock purchased from the Airport Commission. The cutting and trimming of trees was continued as in the past and 35 new trees were set out in parks.

It is hoped that certain improvements to the incinerator roof at the city dump may be completed in the coming year, so as to eliminate a maintenance problem.

The Sewer Department maintained the sewer system as in the past and also completed 13 new house connections; 6 new catch basins and 1 new manhole. 12 catch basins were rebuilt and 35 repaired; also 5 manholes were repaired. An 8" sewer

on North Church Street was extended 52 ft. to accommodate a new residence and 10 ft. of 8" sewer was extended on lower Park Street. It is proposed to extend a sewer on Billings Avenue to Harvard Street in the coming year. A right-of-way through private land has been received by the city for the purpose of extending this project.

The work of the Water Department increased substantially over the preceding years due to unusual conditions.

A disastrous flash flood struck the waterworks head in Mendon on June 24th causing thousands of dollars of damage to the plant. The chlorine and valve houses were washed away with all equipment therein. The intake channel was ruined and one of the dams on the small reservoir was carried away. The large reservoir was undamaged but a large amount of silt and debris was carried into it, thus necessitating cleaning. The entire force of the Public Works Department was sent to Mendon to repair the damage and in approximately a week the water in the system was fit for human consumption without boiling.

Repairing flood damage at Water Works

Plans had been proposed and a new Automatic Vacuum Feed Chlorinator had been ordered previous to the flood and work was immediately started to place it into operation. The new chlorinator went into operation on the 13th day of October and since that day no adverse reports have been received regarding contaminations.

A new building, constructed of cinder blocks and built as a part of the previously constructed meter house, was erected to house the chlorinating machinery. The new structure is practically 100% fireproof and has many modern facilities for sampling and testing the water.

Power shovels were hired and in cooperation with the Central Vermont Public Service Corporation the work of cleaning out the channels above and below the instake dam was completed. There still remains much work to be done to protect the water intake system and the Department proposes to carry on an improvement program from year to year under their annual appropriation.

As an aftermath of the flood it was found that there was considerable damage to the Gleason Reservoir—which is the old, original water supply for the City of Rutland. The city has maintained this system for years without any return whatsoever, and upon investigation it was found to be possible to allow the system to revert to the original owners or heirs. This was done and the City now has rid itself of a considerable annual expense.

The City exchanged a parcel of land on the Cold River watershed for land adjacent to property owned by the City which will enable the Water Department to construct a diversion ditch or pipe line direct from the Eddy Brook to the Brewer Brook on their own property for the purpose of augmenting our water supply if necessary.

The Water Department also maintained the water mains, hydrants, valves; installed 9 new house connections; relayed 23 house connections, and repaired 18 house services. This department also furnished a caretaker at the municipal pool during its operation as well as carrying out a number of recommended changes.

I would like to express my sincere thanks and appreciation to all employees of the Public Works Department for their meritorious and cheerful performance of their various duties, especially during the trying and anxious moments at the Mendon Water Works in June. My thanks also to the Fire Department

for their assistance and use of their equipment at the same time, as well as at other times during the past.

To His Honor the Mayor, to the President of the Board of Aldermen, the members of the Honorable Board of Aldermen and all other City Officials, I wish to express my most sincere appreciation for their kind cooperation and assistance at all times.

Respectfully submitted,

W. V. KALLIO,
Commissioner of Public Works.

Report of the MEAT INSPECTOR

To the Honorable City Council:

Gentlemen:

All meat has been inspected in accordance with the City Ordinance. All animals were fully inspected before slaughtering doubtful animals rejected, and those which appeared healthy were butchered, and the meat inspected. Any doubtful carcasses were rejected.

From the meat inspections \$1,856.75 has been received and turned over to the City Treasurer, as follows:

| | | |
|--------------|-----------|------------|
| 1,655 calves | at \$.50 | \$842.50 |
| 844 cattle | at 1.00 | 844.00 |
| 1,281 lambs | at .25 | 32.00 |
| 139 swine | at 1.00 | 139.00 |
| 11 goat | at .25 | .25 |
| | | <hr/> |
| | | \$1,857.75 |

Respectfully submitted,

N. H. COX,
Meat Inspector.

Report of the PENSION BOARD

Net Cost to City—\$31,342.34

To the Honorable City Council:

Gentlemen:

For the eighth year of its operation, the City of Rutland Pension Plan which became effective January 1, 1938 has resulted in a net cost to the City of \$31,342.34. This figure is explained as follows:

| | |
|---|-------------|
| Total Premiums paid to Insurance Co..... | \$33,631.62 |
| Total Benefits paid to Pensioners..... | 6,092.88 |
| | <hr/> |
| | \$39,724.50 |
| Less total amount of Employees' contributions | 8,382.16 |
| | <hr/> |
| | \$31,342.34 |

Since the start of the Plan twenty-four employees have been retired. Of these seven have died, leaving seventeen who are still on the retired list. Five more will reach the retirement age January 1, 1946.

As of December 31 there are 142 contributing members, 74 from the School Department and 68 from the other departments of the City with 21 new members joining January 1, 1946.

Several meetings of the Pension Board have been held for the granting of pensions, the issuance of permits to continue employment after the voluntary retirement age, and for the transaction of other business necessary to the successful operation of the Plan.

At present there are six members of the Pension Plan in the armed forces: Frederick Atherton, Robert Lorette, Lloyd Flaitz, John Davis, Helen Bailey, Edward Crowley.

The budget requirements for 1946 will be \$31,000.00.

Respectfully submitted for the Committee,
ESME A. C. SMITH,
Chairman.

Report of the FIRE DEPARTMENT

To the Honorable City Council:

Gentlemen:

I hereby submit to you my annual report covering the activities of the Fire Department for the year 1945.

The Fire Department responded to four hundred thirty-six alarms during the year, an increase of twenty-seven over the previous year. Fifty-five of the alarms were false, twenty-six of the false alarms were on VJ Day. Fifteen calls were needless, leaving a total of three hundred sixty-six actual fires. The Fire Department also responded to forty-one special service calls of various nature.

The fire at the Gryphon building November 22nd, was the most serious fire in several years, it being necessary to call help from West Rutland and Proctor. Both of those departments responded very quickly and gave valuable assistance.

Eight firemen required medical treatment and two firemen were hospitalized for smoke inhalation and for treatment of their eyes.

I cannot give the exact loss on this fire as I have been unable to get the final loss adjustment at this time but the total damage, including insurance paid and property damaged that was not covered by insurance will be approximately \$120,000.00.

The value of property endangered by fire, the amount of insurance carried and the insurance paid on other fires occurring during the year was as follows:

| Value | Buildings | |
|--------------|-------------------|----------------|
| | Insurance Carried | Insurance Paid |
| \$354,251.00 | \$310,100.00 | \$23,603.54 |
| | Contents | |
| | | |
| 107,001.00 | 175,100.00 | 8,652.19 |
| Totals | | |
| \$561,252.00 | \$485,200.00 | \$32,255.73 |

The fire department consists of twenty regular firemen and twelve call men. The Auxiliary members, organized in 1942, have nearly disbanded. Some have returned the helmets, fire coats and boots issued to them and some are still interested enough to want to keep the fire fighting clothes and volunteer to help when called upon.

I wish to thank all of the men that served as members of the auxiliary fire force for the valuable assistance given the City when called upon.

Apparatus

- 1 1919 750 G. P. M. American LaFrance triple combination.
- 1 1924 750 G. P. M. American LaFrance triple combination.
- 1 1927 75 ft. American LaFrance aerial truck.
- 1 1936 750 G. P. M. Buffalo quadruple truck.
- 1 1941 750 G. P. M. Buffalo triple combination.
- 1 1938 $\frac{3}{4}$ ton Service truck.
- 1 1939 Sedan.
- 1 500 G. P. M. trailer pump.

Fire Alarm System

The fire alarm system has required considerable attention the past two years as replacements were hard to get. There are several fire alarm boxes that were installed between 1890 and 1900 that are weather worn and give some trouble in cold weather. We have had requests for fire alarm boxes to be installed on the outskirts of the city which would require the extension of the fire alarm system. We will be unable to extend the system in 1946 as it would require an additional appropriation.

I would recommend that we replace two of the old boxes each year and adopt a system of adding three new boxes each year until we have the districts requiring fire alarm boxes covered.

One of the air tanks for blowing the whistle developed a leak and when tested by a boiler inspector it was condemned as dangerous. It was found to be considerable cheaper to replace the whistle than to replace the tanks and a new whistle was installed requiring much less air than the old one.

Traffic in the business section has increased considerably in the last six months making it difficult for fire apparatus to get through Merchants Row and Evelyn street. I would recommend that Evelyn street be made a one way street going north only. This would eliminate the danger of accidents by meeting south traffic on Evelyn street. It would also eliminate left turns from Evelyn street onto Merchants Row which slows south traffic on Merchants Row.

The operating cost of the Fire Department for 1945 was as follows:

| | |
|---------------------------------------|-------------|
| Pay roll | \$49,269.39 |
| General supplies | 5,970.25 |
| New fire whistle | 648.43 |
| New furnace at Station 2 | 189.30 |
| Replacements after Gryphon fire | 242.00 |
| Total cost for 1945 | \$56,319.37 |
| Appropriation | \$55,616.52 |
| Received for out of town fires | 525.00 |
| Gasoline for Police Department | 449.34 |
| Wiring permits | 50.00 |
| Miscellaneous | 134.64 |
| Special appropriation for new whistle | 700.00 |
| Total | \$57,475.50 |
| Total operating cost | 56,319.37 |
| Balance returned | \$1,156.13 |

I wish to thank all of the members of the Fire Department, the Police Department, the Department of Public Works and all of the City Officials for their help during the year.

Respectfully submitted,
 ALFRED H. KOLTONSKI,
 Chief of Fire Department.

Special Service Calls

| | |
|---|----|
| Drowning accidents | 2 |
| Investigate cause of smoke in building | 4 |
| Investigate cause of explosion in chimney | 1 |
| Investigate cause of oil burner trouble | 3 |
| Investigate cause of noise in attic | 1 |
| Investigate trouble in lighting fixtures | 2 |
| Open drain in flooded cellar | 1 |
| Pumping cellars after flood | 4 |
| Pumping water to clean reservoir | 2 |
| Remove cat from tree, etc. | 9 |

The Police Department has modernized the equipment with a two-way General Electric F. M. Radio which enables headquarters and patrol cars to keep in touch with each other constantly. Headquarters can get a car to the scene of a crime without loss of time. Since the patrolmen in cars are able to receive orders anywhere in the City there is no need for any of them to be kept in reserve in the station.

All regular officers are third class license operators. Radio is used for police calls and information only.

Station announcements are made at 12 midday and 12 midnight as follows:

Station W. B. M. I. owned and operated by the Rutland Police Department. Operated on assigned frequency of 39100 Kilocycles by authority of the Federal Communication Commission.

This radio is under supervision of Chief Engineer Norval K. Ramson, Jr., first class license operator.

Bids have been advertised for a new patrol car.

Three Officers will be added to the regular force in the near future.

Very truly yours,

JOHN L. DINN,
Acting Chief.

Presentation of Arm Bands to Members of Bicycle Patrol

Report of the BICYCLE PATROL & BICYCLE COURT

To the Honorable City Council:

April 21st and May 22nd of 1946 will mark the completion of three years operation of Rutland's Bicycle Patrol and Bicycle Court, respectively.

On the day of this report, January 30, 1946, there have been 1,338 bicycles registered. According to the revised Bicycle Ordinance of 1945, new registration will be from April 1st to March 31st of the following year.

Each May new judges are selected from the Junior Classes of Rutland High School and Mount St. Joseph's Academy. Each September it is necessary to reorganize the Patrols in the Schools.

From January 1st to December 31st, 1945 inclusive, 263 Patrol report slips were turned in at Police Headquarters. Of these, 46 were for riding on the sidewalk, 52 for riding two on a bike, 42 for no lights after dark, 136 for lack of or faulty equipment, such as horn, reflector, brakes, etc., 56 for no registration plates, 18 for traffic violations, and 2 for riding three on a bike. These all had to be sifted, and, where deemed necessary for Court appearance, contacted by a Police Officer. For instance, 103 slips were turned in from September to December, but only 41 cases had to be brought into Bicycle Court.

Credit and thanks for the success of the Patrol and Court this past year is due Officer Francis A. Ryan, who was appointed Officer in Charge by Chief Harold S. Potter.

Accidents do happen, 3 having been reported in the newspapers, 2 of the bicyclists involved requiring hospitalization. No fatalities reported.

The Committee regrets the resignation of Chief Potter. The Bicycle Patrol and Bicycle Court which he established during his term of office have received recognition from the National Safety Council, Arizona State Highway Department, the F. B. I., Bristol, Conn. Chief of Police, and Belle Fourche, So. Dakota. Besides materials sent to the out-of-state inquirers reports and information of our set-up have been mailed to interested parties within the State.

To the Principals and teachers of the schools, the Police Department, the Service Clubs who have furnished insignia and entertained the Patrol and Court, and to the City Officials for their continued fostering of this Safety project—the Committee is indeed grateful, and anticipates their continued cooperation.

Respectfully submitted,

LUCILLE K. CURTIS,

Chairman and Secretary,

Rutland Bicycle Safety Committee,

OLD AGE ASSISTANCE DEPARTMENT

Net expense to City—\$20,369.00

VERMONT OLD AGE ASSISTANCE DEPARTMENT
120 STATE STREET
MONTPELIER, VERMONT

For the information of your taxpayers the customary annual statement is presented for your town report.

Payments of Old Age Assistance to persons applying from your town amounted to \$65,595.00 during the year January 1, 1945 to December 31, 1945.

The number of recipients in December, 1945 was 216.

The resources of this department and its ability to make payments are determined by the state appropriation which is matched by federal funds. During recent months it has not been possible to grant assistance or to increase all who were found eligible after investigation. The cost of living has increased so much that about every case needs to be increased that is not now getting the maximum. The cooperation of Overseers in extending temporary aid and supplementary medical services has been very helpful.

The administrative expenses of this department have risen slightly during the biennial period but the administrative review of the Social Security Board emphasizes that the total administrative cost per case per month is among the lowest in the country.

The advice and counsel of local officials and interested people are gratefully acknowledged by this department and its field staff.

Very sincerely yours,

W. L. SEWARD,

Director.

Report of the HEALTH OFFICER

To the Honorable City Council:

Gentlemen:

It is the pleasure of your Health Officer to submit, herewith, his annual report for 1945.

The Health Department is composed of a three-man Board of Health and a Health Officer.

Through this department is maintained the control of communicable diseases, inspection services for the maintaining of sanitary plumbing facilities, swimming pool and other places of public assemblage.

The following contagious diseases were reported and quarantined during the year 1945:

| Month | W. C. | Mumps | G. M. | Polio | C. P. | Measles | S. F. |
|-------|-------|-------|-------|-------|-------|---------|-------|
| Jan. | 0 | 0 | 1 | 0 | 16 | 0 | 2 |
| Feb. | 1 | 0 | 1 | 0 | 42 | 1 | 2 |
| Mar. | 1 | 45 | 39 | 0 | 67 | 0 | 3 |
| Apr. | 0 | 24 | 58 | 0 | 24 | 0 | 0 |
| May | 0 | 37 | 45 | 0 | 28 | 1 | 0 |
| June | 0 | 18 | 24 | 0 | 34 | 0 | 1 |
| July | 4 | 37 | 0 | 0 | 17 | 0 | 2 |
| Aug. | 15 | 19 | 3 | 2 | 10 | 2 | 1 |
| Sept. | 17 | 2 | 0 | 3 | 0 | 0 | 0 |
| Oct. | 14 | 0 | 2 | 1 | 3 | 0 | 3 |
| Nov. | 30 | 7 | 0 | 0 | 5 | 1 | 0 |
| Dec. | 20 | 12 | 2 | 0 | 1 | 1 | 0 |
| Total | 102 | 201 | 175 | 6 | 247 | 6 | 14 |

Abbreviations—W. C. Whooping Cough
G. M. German Measles
C. P. Chicken Pox
S. F. Scarlet Fever

The annual free Small Pox vaccinations were done in May. A total of 163 children received the vaccinations.

The annual free inoculations to immunize children against Diphtheria were done in October and November. A total of 184 children received this immunization. Drs. Hodsdon and Beale of the Board of Health, assisted by Mrs. Wimett and Miss Keefe, school nurses, did the work on both of the above programs.

A total of 325 samples of water from the city's taps were sent to Burlington for analysis. These were broken down into 1,625, 10 CC portions. Of these, 36 showed presence of coliform organisms or .022% contamination. Due to the heavy storms in June and October the percentage contamination doubled over

last year's .013%. However those who did not view the reservoir could have no conception of the terrific damage inflicted there by the late June storm. Commissioner Kallio and members of his department are to be congratulated for the speed in which they reorganized the then existing conditions. Due to the prompt action of these men and the State Department of Health, at no time was there actual danger from our water supply, although it was ordered boiled for several days as an extra added precaution.

A total of 46 samples of water from the swimming pool were sent to Burlington during June, July and August. Three of these samples were contaminated. The pool was managed excellently throughout the season.

Two inspections of the city's schools were made during the year and conditions on the whole were good. In company with Mr. Cole, State Health Inspector, an inspection of the Colony House and the Women's Reformatory, was made. Conditions at both institutions were excellent from a health standpoint. Miss Koltonski and Miss Dolan are both to be congratulated on their very excellent supervision of these buildings.

In company with Mr. Cole, inspections were made of all eating establishments at the Rutland Fair.

This department investigated 103 nuisance complaints and made three plumbing inspections.

On several occasions inspections of food handling establishments were made in cooperation with Mr. Cole of the State Department of Health. Several visits to the watershed were made with Mr. Kallio, City Engineer and Mr. Cole from the State Department of Health.

Several talks were made to lay organizations on Community Health during the year.

Eight cases of unattended death from natural causes were investigated by the department.

In closing I would like to express my appreciation for the courtesy and cooperation that I have received from the City Officials, the State Board of Health, the School Nurses, and the physicians and parents of the City of Rutland.

Respectfully submitted,
CHARLES D. BEALE,
Health Officer.

Board of Health:
WALTER G. HODSDON, M.D.
HUGH H. HANRAHAN, M.D.
FRED BEAUCHAMP, Phg.

Report of the INSPECTOR OF BUILDING

To the Honorable City Council:

Gentlemen:

I herewith submit the following report of building notifications for the year ending December 31, 1945:

| | |
|---------------------------------|----|
| Houses | 8 |
| Remodel Cabins into Houses | 1 |
| Repair Houses | 3 |
| Porches | 6 |
| Additions to Tourist Homes | 1 |
| Private Garages | 13 |
| Additions to and Repair Garages | 6 |
| Additions to Amusement Halls | 1 |
| Restaurants | 1 |
| Additions to Diners | 1 |
| Ticket House at Athletic Field | 1 |
| Sheds | 4 |
| Poultry Houses | 1 |
| Warehouses | 3 |
| Repair Warehouses | 1 |
| Additions to Creameries | 1 |
| Additions to Railroad Stations | 1 |
| Remodel Business Blocks | 2 |
| Additions to Business Blocks | 4 |
| Cabinet Shops | 1 |
| Service Stations | 2 |
| Demolish Buildings | 3 |

Respectfully submitted,
C. G. NOYES,
Inspector of Buildings.

Report of the MILK INSPECTOR

To the Honorable Board of Aldermen:

Gentlemen:

The following is your Milk Inspector's report for the period from April 1, 1946 through December 31, 1945:

Three hundred and ninety-one dollars (\$391.00) has been collected for milk licenses and the money turned over to the City Treasurer. These licenses were distributed as follows:

| | |
|------------------------|----|
| Stores and Restaurants | 86 |
| Producers | 31 |
| Producer-Peddlers | 12 |
| Peddlers | 6 |
| Creameries | 5 |
| Wholesalers | 1 |
| Fair Grounds | 7 |

The new pasteurization ordinance has been very effective and has the wholehearted support of the milk peddlers and dairymen.

Milk samples have been taken periodically and sent to Burlington, Laboratory of Hygiene, or to the Massachusetts Dairy Laboratories, Inc.; these reports are on file at the City Clerk's office.

Most of the dairies have been inspected and all the pasteurization plants. On the whole, conditions were good and with shortage of materials easing up all the time, we hope to find them even better in 1946.

I wish to thank the producers, plant operators and state inspectors for their cooperation during the past months.

Respectfully submitted,
CHARLES D. BEALE,
Milk Inspector.

Report of the CITY ATTORNEY

*The Honorable City Council,
City of Rutland, Rutland, Vermont:*

Gentlemen:

I, hereby, submit my report to the City of Rutland, for the year 1945.

There are no law suits of any matter, now pending against the City of Rutland. During the past year, a number of minor court suits were brought by the City Attorney for collection of delinquent taxes, which resulted in the collection of such taxes by the Tax Collector.

Various matters were handled for the Charity Department, in cooperation with the Overseer of the Poor, and a number of individuals, suffering from mental illness, were committed to the State Institution, through Probate Court Action.

Various contracts were drawn in connection with the management of the Airport, and your attorney met, on a number of occasions, with the Airport Commissioners, in regard to legal matters, relative to the development of the Rutland Airport.

Throughout the year, legal opinions were rendered by the City Attorney for almost all branches of the City Government, and a number of consultations were held with department heads and members of the various City Boards.

Several ordinances were revised and withdrawn during the year, which were passed by the City Council, and a system of application blanks and applications were set up for the Police Department.

Your City Attorney has continued his practice of attending all City Council Meetings during the year, so that prompt response could be given to council members, desiring legal information. It is believed that this practice helps to expedite the work of the Board and officers of the City.

I would, again, like to express my appreciation to his Honor, Mayor Temple, members of the Board of Aldermen and the heads of various city departments for the cooperation received from them, and the harmonious relationship that has existed throughout the year.

Respectfully submitted,
MILFORD K. SMITH,
City Attorney.

CONSTABLE AND TAX COLLECTOR

To the Honorable City Council:

Gentlemen:

I respectfully submit the following report of my doings as City Constable and Tax Collector for the year 1945.

The collection of delinquent taxes turned over to the City Treasurer amounted to \$16,394.99 and water rent collections \$1,427.75, making a total of \$17,822.74 from January 1, to December 31, 1945.

During the year just passed 1,071 Poll, Old Age Assistance and Flood taxes were collected for the years 1936 to 1945 inclusive. A campaign drive for collection of delinquent Poll taxes was made during last spring, which was fairly successful and it developed many delinquents were receiving Old Age Assistance and from State charitable sources and therefore uncollectable and have been written off the City books.

Several tax sales were advertised on Real Estate that have been in arrears for a number of years, which payment was made by the owners before the time set of sale and tax lien discharged. Mr. Milford Smith, City Attorney, was of fine cooperation and guidance on all legal matters in the procedure that was necessary to a successful settlement.

I would like to express my thanks and gratitude to His Honor, Mayor Temple, the Honorable Board of Aldermen, City Attorney and all department heads and assistants for their usual fine and excellent cooperation given to me at all times.

Respectfully submitted,
JOHN J. CARBINE,
City Constable and Tax Collector.

Report of the CITY CLERK AND PURCHASING AGENT

To the Honorable City Council:

Gentlemen:

I hereby submit report of activities in the Clerk's Office for the year 1945.

A total of \$9,569.50 was collected and turned over to the City Treasurer. This amount represents general city licenses, beverage licenses, dog licenses and clerk's fees from all sources. (For detail see report of the City Treasurer on receipts.)

1,135 dogs were licensed in 1945, which is considerably in excess of the number registered in any recent year.

Fishing and Hunting licenses are sold here under the supervision of the Fish and Game Department of the State of Vermont, and the amount received from such sales remitted to the State Treasurer. The fees allowed on such licenses under the Law of the State of Vermont have been turned over to the City Treasurer.

Materials and supplies for all city departments are purchased through this office. All of the larger items are advertised publicly through the Rutland Herald.

Among the larger items purchased in 1945 was a new fire truck for station No. 2, a new chlorinator for the reservoir, and boilers and radiation for school buildings.

Up to the close of the year, approximately 900 honorable discharges of veterans from the Armed Forces have been recorded and in many cases, copies of such documents furnished the veterans. This service is maintained at no expense to the veterans.

There was a total of 621 births, 155 marriages, and 295 deaths recorded here in the year 1945.

A report of Vital Statistics follows:

VITAL STATISTICS

| | |
|---|-----|
| Total number of births registered in 1945..... | 621 |
| Total number of marriages registered in 1945..... | 155 |
| Total number of deaths registered in 1945..... | 295 |

In closing, I would like to express my appreciation for the courtesy and cooperation which I have received from all city officials and especially to his Honor, the Mayor, and the Board of Aldermen.

Respectfully submitted,

HENRY P. BATTLES,
City Clerk and Purchasing Agent.

Report of the WELFARE DEPARTMENT

To the Honorable City Council:

I hereby submit the following report for the year 1945.

The appropriation to the Department of Charities and Corrections was \$26,000.00. The department collected \$662.68 for support of families from other towns; \$1,072.16 from individuals; \$2,505.02 from other sources; \$5,000.00 was transferred to the hospital account.

The gross expense amounted to \$27,855.11. The net expense after refunds was \$23,615.25. A balance of \$2,384.75 remained in Charity account at the end of year. (A detail of all expenditures, etc., appears in the financial section of this report.)

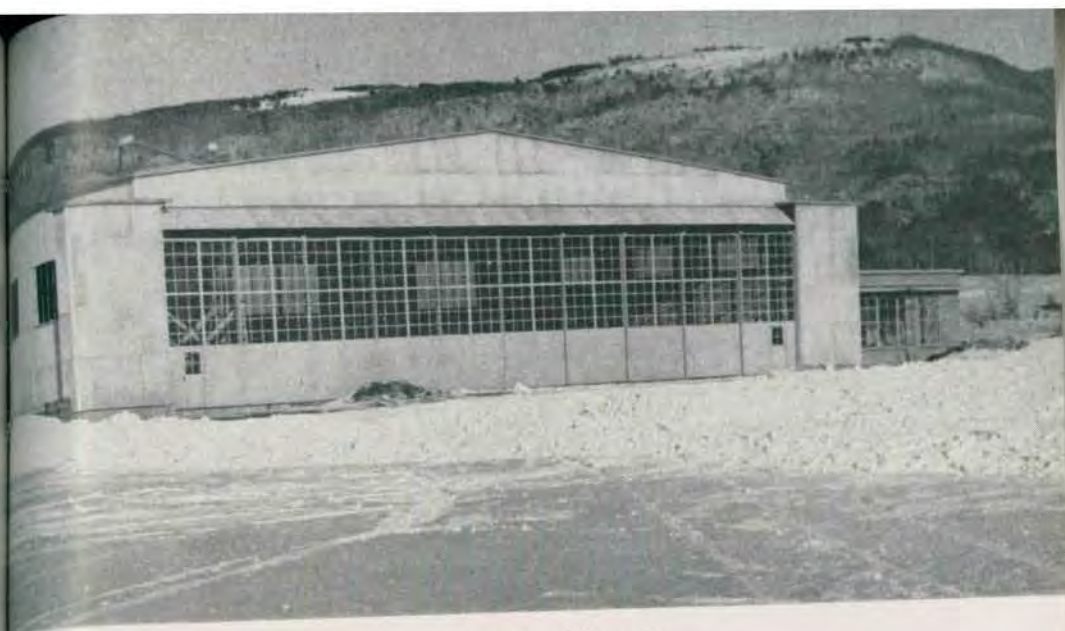

The appropriation for the hospital was \$12,000.00. Refunds from towns and individuals was \$3,395.63. The amount transferred from the General Account was \$5,000.00. The gross expense was \$18,108.69 and the net expense after refunds \$14,713.06. A balance of \$2,286.94 remained in the hospital account at the end of year.

At the City Farm 22 inmates have been cared for and 39 transients have been accommodated.

I want to thank all City Officials for their assistance and cooperation during the year and to those in the Charity Department for their efficient services.

Respectfully submitted,

O. S. BERGSTROM,
Overseer of Poor.

Hangar, Rutland Airport

Report of the RUTLAND AIRPORT COMMISSION

To the Honorable City Council:

Work done by your airport commission in 1945 will bring the long-awaited full-scale operation of Rutland airport in 1946.

Despite shortages of labor and delay in deliveries of critical materials, the airport hangar, 100 feet wide and 80 feet long, with offices and shops attached, will be ready for use during the coming year. The construction of the hangar was necessarily slow, but your commission is happy to report that the city has a hangar for a small city airport use second to none in New England or the east. This hangar will be fittingly dedicated during 1946.

The commission insured sound fixed base operations at the airport, including flying instruction, sale of gasoline and supplies and the hangaring of local and visiting planes, by signing a three-year contract with our present operators, Rutland Airport, Inc. The contract includes a provision, under which John J. Laudenslager, local manager for Rutland Airport, Inc., will serve as full-time manager at the airport.

Your commission's long fight to gain airline stops at Rutland had its first success in November, when the Civil Aeronautics board examiners recommended that Rutland be made a flight stop by Colonial Airlines of New York on this well-known airline's New York-Montreal runs.

Your commission also was in contact with Eastern Airlines of New York and Northeast Airlines of Boston in connection with petitions for Rutland stops, which these two lines have filed with the Civil Aeronautics board.

In this connection, the commission cooperated with the Rutland Chamber of Commerce in sponsoring "Aviation Night" at the annual meeting of the Chamber. Sigmund F. Janas, Jr., traffic manager of Colonial Airlines, Dr. L. G. Lederer, director of personnel of Penn Central lines, which has asked that it be permitted to merge Northeast Airlines and Charles Grinnell of Montpelier, area representative of Northeast Airlines, were speakers. Janas promised Rutland immediate New York service as soon as the full Civil Aeronautics board approved the Rutland stop. The Penn Central representative said that this big line plans great expansion of the present Northeast lines into northern New England.

The commission was represented at meeting of New England aviation officials at Boston, Burlington and Newport and was kept in constant touch with developments in the state and New England on all aviation matters.

During the year the commission directed the work of renovating the Butler house on the Airport property as a dwelling place for airport personnel. This house is now in use.

The commission backed new state aviation legislation, which will be of permanent benefit to Vermont aeronautical development.

Erection of an administration building to meet the demands of the coming airline era, the building of more small individual hangars to meet the needs of the private flyers and further improvements of the airfield are among the commission's plans.

The commission feels that Rutlanders are fully aware of the value of air transportation and will do everything in its power to see that the city develops its modern airfield to meet the needs of the future.

In closing the commission thanks Mayor Temple, Acting Mayor Carbine, City Clerk Battles, City Treasurer Roberts, Commissioner of Public Works Kallio, Chairman Loveland and the aldermanic aviation committee, President William Johnston, Jr. of the Rutland Chamber of Commerce and Chamber of Commerce personnel and the many others who have assisted its members during the past year.

Respectfully submitted,

RUTLAND AIRPORT COMMISSION

Gerald E. McLaughlin, *Chairman*
George C. Cobb
Carleton Wilson.

Playground Supervisor and Assistants—1945

Report of the SUPERVISOR OF RECREATION PROJECTS

To the Honorable City Council:

Gentlemen:

The Rutland City Playgrounds, operating for a period of nine weeks during the summer months, finished another successful season on August 23, 1945. Forced to work under strict wartime restrictions, the city was able to furnish the best kind of recreation for the thousand different children who registered on the playgrounds during the summer. It was estimated that over 25,000 children were in attendance throughout the nine-week program.

In addition to the five playgrounds operated at Dana, Park, School, Watkins and Lincoln, a new playground was opened at the south end of the Main Street Park. This new project was intended for the use of small children living in that area or those children who visited the park with their parents. Another feature of the 1945 program was the appointment of two special supervisors to take care of special activities. Miss Jean Smith, an instructor with two years playground experience, was placed

in charge of the playgrounds swimming program at the pool in the mornings, and acted as supervisor of girls athletic contests in the afternoon. Mrs. W. Ross Fearon supervised the special reading program conducted on the playgrounds in the morning.

A sum of \$4,205.01 was appropriated for the project with about \$2,700 being expended on supervision and the rest on equipment. A new swing structure and teeters were installed at Park Street, while a slide, teeters, a swing structure and a jungle gym were placed at Main Street Park. The swing structure was borrowed from Dr. Hugh Hanrahan for the summer and was returned at the end of the playground season. Five slides and two nursery swing structures, purchased early in the year, arrived too late for use during the past season, but will be available for next year. Over \$400 was expended for baseballs, softballs, bats, volleyballs, badminton sets, sand pails and children's games.

Besides Miss Smith and Mrs. Fearon, thirteen instructors were included on my staff. Ralph Kehoe and Patricia Kol-tonski acted as instructors at Lincoln; Roderick Clifford and Lorraine Bleickhardt at Dana; Tom Ross and Mary Jane Duffy at Park Street, Jack Kelly and Peggy Ann O'Connell at School Street; Bill Flory and Barbara Warner at Watkins Avenue; Patricia Flynn, Claire LeFrancois and Kathleen Tree at Main Street Park.

Competitive leagues in baseball and softball for the boys, and slugball and volleyball for the girls were organized and conducted throughout the season. Special events in the form of track meets, swimming meets, horseshoe contests, and basketball free throw tournaments added individual interest to the program. A doll contest and a pet show for the smaller tots were conducted under the supervision of Mrs. Fearon. The Annual Field Day, sponsored by Rutland Lodge of Elks, brought the 1945 season to a happy ending.

Wartime restrictions, particularly on steel structures and athletic equipment, has made it difficult for us to do all of the things that we would like to do for the children of Rutland. It is my hope that in the future we will be able to add gradually to our structural equipment so that the play needs of the smaller children will be better met.

I wish to thank the Mayor and the members of the Park and Playground Committee for their cooperation. I, especially desire to thank Mr. Robert Branchaud, Chairman of the Committee, who took a personal and active interest in helping me to locate and secure equipment for our program and in aiding me in the many details involved in playground supervision.

Sincerely yours,

LEO F. KEEFE,
Director of Playgrounds.

Report of the SWIMMING POOL MANAGER

*To the Committee on Parks and Playgrounds,
Board of Aldermen, City of Rutland:*

Gentlemen:

Herewith is my report on the operation of the municipal swimming pool for the season of 1945, which covered a period of 10 weeks from June 18 to August 25th. The project ran for an 11-week period in 1944.

Receipts were as follows:

| | |
|-------------------------------------|------------|
| Sale of Tickets of Admission..... | \$1,354.33 |
| City Appropriation for repairs..... | 950.00 |
| City Appropriation for deficit..... | 838.55 |
| | <hr/> |
| | \$3,142.88 |

Expenditures:

| | |
|-----------------------------|------------|
| Payroll..... | \$1,476.00 |
| Light, Power and Phone..... | 163.49 |
| U. S. Admission Taxes..... | 246.89 |
| Materials..... | 88.22 |
| Painting and Repairs..... | 1,168.28 |
| | <hr/> |

\$3,142.88

Attendance for the season totaled 13,890 persons; 13,633 children and 257 adults. This compares with admissions of 20,223 sold in 1944. Playground admissions, which are free, totaled 525 and scout admissions, at a reduced rate, totaled 173.

While 6,333 fewer admissions were sold this season than in 1944, it should be remembered that the pool was closed due to the flash flood, from June 23 to July 8, two of the best swimming weeks of the season, and that this had much to do with the total admissions for the year. Also, the number was only 2,567 under the attendance for the full season in 1943.

The average daily attendance at the natatorium was 248 as compared with 262 in 1944. Both figures include evenings, Sundays and days when the pool was closed on account of inclement weather. The 1945 figure, however, does not include the two-week period the pool was closed due to the flash flood.

I took over the pool duties from Francis N. Hinchey on August 3rd and more or less continued with the same force of employees for the remainder of the season. The policy of Hinchey and his predecessor, Ellery R. Purdy, of keeping the pool attractive and sanitary at all times was carried out under my direction.

I was very impressed during the year by the many out-of-state visitors that stopped to admire the pool, both from the standpoint of beauty and cleanliness. Surely it is one of Rutland's greatest assets, and has proven to be a safe place for the city's youngsters to swim.

In closing I would like to extend my sincere thanks to the Parks and Playgrounds committee, and other board members and city officials who made frequent trips to the pool, for their splendid cooperation during the season.

Sincerely yours,

BARRY BRANON,
Manager.

VERMONT STATE GUARD

During the past year Rutland has continued to support the Vermont State Guard which was formed in 1941 to take over the duties of the Vermont National Guard when that organization was called for active duty.

Company A is the chief line of defense in military matters for this area, operating as a unit of the First Battalion, Vermont State Guard. Its authorized strength is 50 enlisted men and 3 officers.

The following is the Roster of Company A as of December 31, 1945:

| Name | Rank | Years Service |
|-----------------------|------------------------|---------------|
| Howard W. Douglas | Captain | 5 |
| Peter Roberts | First Lieutenant | 5 |
| Charles H. Littler | Second Lieutenant | 4 |
| Everett G. Utley | First Sergeant | 3 |
| John Liptak | Sergeant | 5 |
| Porter J. Flanders | Sergeant | 3 |
| Anthony Bizzaro | Sergeant | 2 |
| Earle B. Fuller | Supply Sergeant | 2 |
| Alan W. Burr | Sergeant and Clerk | 3 |
| Ray W. Cheney | Sergeant and First Aid | 2 |
| Lucius Shevidaw | Corporal | 2 |
| Albert Klick | Corporal | 2 |
| Elwell Sherwin | Corporal | 2 |
| William Razanouskos | Private First Class | 3 |
| Raymond Leonard | Private First Class | 2 |
| Mason W. Hier | Private | 1 |
| Vernon E. Hughes | Private | 1 |
| William E. Lethbridge | Private | 1 |
| Emmett A. Maranville | Private | 1 |
| Stewart F. Scruton | Private | 1 |
| Douglas R. Smith | Private | 1 |
| John E. Tomlinsong | Private | 1 |
| Clifton R. Tyrrell | Private | 1 |

The following Rutland men are also serving on the Staff of the First Battalion which has its headquarters at the Rutland Armory.

CITY OF RUTLAND

| Name | Rank | Years Service |
|------------------|---------------------------|---------------|
| John L. Cootey | Colonel and Batt. Com. | 5 |
| Robert G. Morse | Captain, Plans and Train. | 5 |
| Ralph J. Bugbee | Captain, Intelligence | 5 |
| Gus G. Corsones | Captain, Transportation | 5 |
| Guy W. Whitecomb | Captain, Supply | 5 |
| James A. Haugh | Sergeant, Clerk | 5 |
| M. E. Walbridge | Sergeant | 3 |

REPORT OF AUDITORS

To the Honorable City Council:

Your auditors have audited the books of the City Treasurer, City Clerk, Overseer of Poor, Superintendent of Schools, City Constable and Sinking Fund Commissioners, from January 1, 1945 to December 31, 1945, inclusive, and we hereby certify that in our opinion, they have duly accounted for all monies received by them, as evidenced by the books and records on file.

We find the records of disbursements as shown by the City Clerk and Superintendent of Schools in agreement with the entries on the books of the City Treasurer. We have checked the cash and verified the bonds, deposit books and securities in the hands of the City Treasurer and Sinking Fund Commissioners and have checked incomes back to their original sources of entry and found them to be correct.

The books of the City Treasurer are in their usual excellent condition and very clearly show the city's financial condition on December 31, 1945 and the result of operations for the twelve months period ended.

Respectfully submitted,
H. R. HART,
J. E. DONAHUE,
W. E. FLYNN,

Auditors.

Report of CITY TREASURER

To the Honorable City Council:

Gentlemen:

I herewith present to you my report as City Treasurer for the fiscal year ending December 31, 1945.
